

Tianyi Medical - Class 100k Cleanroom

## QUALITY ASSURANCE

Tianyi Medical believes that maintaining quality assurance is the key to successful sourcing in China.

As we are operating in an industry that is highly regulated and requires the strictest quality compliance, Tianyi Medical has developed a culture that is expected of a healthcare organisation.

- Class 100,000 cleanrooms
- FDA Registered
- ISO13485:2003 Certified
- 2001: ISO9001 & ISO9002 Certified
- CE-Marking Submission
- GMP

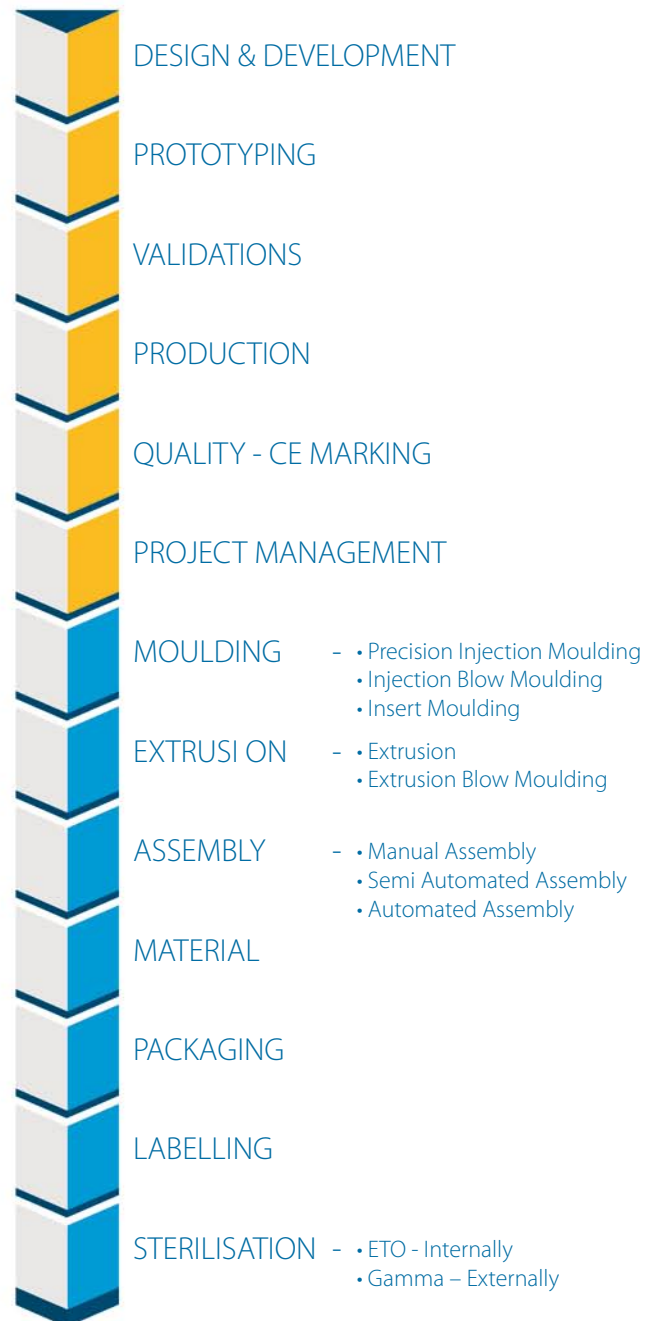

## CLEANROOM MANUFACTURING

Tianyi Medical has over 20 years experience as an OEM manufacturer. In this time we have built a strong reputation with some of the worlds leading medical device and pharmaceutical companies.

We specialise in the production of sterile single-use medical devices, plastic components, pharma packaging, and sub-assemblies. Tianyi Medical have extensive expertise in an array of technologies including extrusion, moulding, assembly, complete packaging solutions and sterilisation. Our robust processes allow us to transfer customer-owned equipment from their existing product lines into our own manufacturing environment.

Through our partnership with GPS China, Tianyi Medical have adopted a western style management system that focuses on delivering high quality low cost manufacturing and six sigma leading edge lean solutions.

Our overall mission is to offer speed, innovation, quality and greater value to our clients global supply chain.

## PROJECT MANAGEMENT

Tianyi Medicals global project team is customised to meet the needs of a particular project. For greater communication and a deeper understanding of our client's requirements our European and Chinese project managers develop a communication plan at the early phases of every new project.

## EXPORT

Tianyi Medical provides a personalised service that is controlled, flexible, reliable and efficient.

In order to uphold the quality and integrity of our clients' sensitive and high value goods we offer transportation in a temperature controlled environment. Tianyi Medicals clients benefit from a single point of contact that gets your product to you competitively and in real time.

- Shipping
- Transit Insurance
- Duty Payments
- Shipping Agent Charges
- Export Licenses & Quota

- VAT at Point of Entry
- Domestic Transfers

## DESIGN & DEVELOPMENT

Our overall design and development objective is to continuously provide excellent and innovative design solutions and processes while enhancing our own capabilities

Each step in our design and development process is clearly defined so they can be used in tandem or isolation of one another. This allows Tianyi Medical to provide a customised service for each individual client. So, whether you require a quick turn-around prototype or a complete design and development of your product(s) we can deliver a highly efficient service to you every time.

Our engineering team are proficient in:

- 3D CAD Systems
- Project Management
- Transferring existing manufacturing lines and assembly processes
